

30 V & 40 V Automotive-Grade N-Channel MOSFET

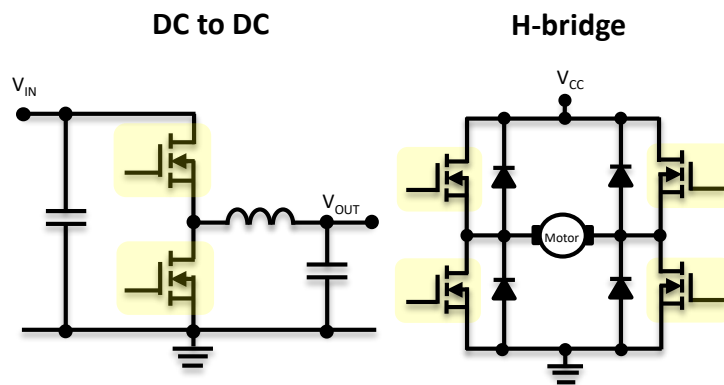

AEC-Q101 qualified with 175°C junction temperature

PANJIT's latest N-channel power MOSFETs are designed with advanced trench technology to provide excellent figure of merit(FOM), lower $R_{DS(ON)}$ and capacitance. The new design reduces conduction losses and switching losses while boosting electrical performances. They are available in DFN3333-8L, DFN5060-8L, DFN5060B-8L, TO-252AA, TOLL, and sTOLL packages, which are low profile packages that save spaces. PANJIT offers a comprehensive solution for highly efficient, reliable and space saving PCB layout applications.

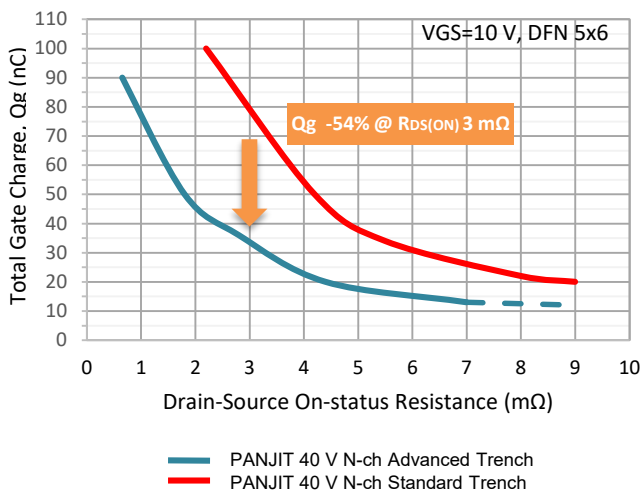

► Features

- 30 V & 40 V N-channel advanced trench
- Low $R_{DS(ON)}$ to minimize conduction losses
- Low FOM to minimize driver losses
- Standard and logic level available
- AEC-Q101 qualified and PPAP capable
- 175°C operating junction temperature

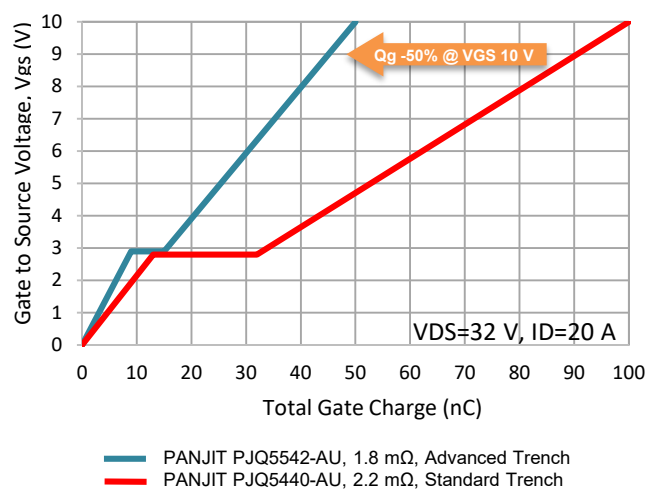

► Block Diagrams

► Figure of Merit (FOM)

► Gate Charge Characteristic

➤ Applications

Automotive

- Power motor drive
- Oil & water pumps
- Infotainment
- ADAS
- Sensor

Power System

- Power supply
- LED lighting
- DC power tool
- Control board
- BMS

Industrial

- Data center
- Telecom
- Server
- Robot
- DC Fan

Consumer

- Wireless charger
- Quick charger
- Vacuum cleaner
- Small appliance
- Drone
